

# WARIOWEATHER AGRO

## Weather station in agriculture

**Wario Weather** is a modern, highly sophisticated compact weather station for analyzing current weather conditions and forecasts. Fast processing of measured values and autonomous control of the actual station will help you to control for example air conditioning or heating of glasshouses. The weather station is capable of automatic control and timing of watering regime and air conditioning based on several parameters and will thus save you plenty of work and time. It also offers a detailed overview of the weather conditions and trends with the possibility to view and analyze historical data and forecasts. It presents a very complex and useful tool for farmers, helping them to achieve optimum yields.

Using the Wario Weather station has many advantages. The measured values can be viewed using clear graphs up to 10 years back. In addition, the intuitive graphical user interface provides many additional and calculated values such as short-term forecast, zodiac, Moon phase, Moon rise and set times, Sun rise and Sun set times, day length, name day etc. All this can be viewed not just on a PC or laptop, but also smartphones, tablets or any other device that has access to the Internet via an Internet browser.

## MAIN ADVANTAGES OF USING THE WEATHER STATION IN AGRICULTURE

-  *accurate measurement of current weather conditions for a particular location and surroundings*
-  *possibility to view historical data and make long-term statistical analyses and also graphs of data up to 10 years back, including calculations of minimum and maximum values*
-  *no additional costs or fees associated with operating the station or publishing data on the Internet*

The weather station provides you with the possibility to share the measured values either by easily integrating it into your own already existing webpage, or you can take advantage of the possibility to use many tools for analyzing the actual and historical data and viewing them directly at **[www.meteo-pocasi.cz](http://www.meteo-pocasi.cz)**.
