

# WARIOWEATHER CITY

## Weather station for municipalities

**Wario Weather** is a modern, highly sophisticated compact weather station for analyzing current weather conditions and forecasts. It enables municipalities to inform inhabitants about local weather conditions and warn them in case of expected or sudden changes in weather conditions, such as high wind gusts, precipitation that could lead to flooding etc. The data and information can be easily integrated into already existing websites and will surely be of interest to the site visitors. Thanks to its compact dimensions and easy install process it offers convenient and trouble-free long-term operation with no additional costs or fees.

Using the Wario Weather station has many advantages. The measured values can be viewed using clear graphs up to 10 years back. In addition, the intuitive graphical user interface provides many additional and calculated values such as short-term forecast, zodiac, Moon phase, Moon rise and set times, Sun rise and Sun set times, day length, name day etc. All this can be viewed not just on a PC or laptop, but also smartphones, tablets or any other device that has access to the Internet via an Internet browser.

## MAIN ADVANTAGES OF USING THE WEATHER STATION BY MUNICIPALITIES

-  *early warnings to help protect people and property during natural disasters*
-  *offering information about current weather conditions, allowing for example to choose the suitable type of activity*
-  *no additional costs or fees associated with operating the station or publishing data on the Internet*

The weather station provides you with the possibility to share the measured values either by easily integrating it into your own already existing webpage, or you can take advantage of the possibility to use many tools for analyzing the actual and historical data and viewing them directly at **[www.meteo-pocasi.cz](http://www.meteo-pocasi.cz)**.
