

# WARIOWEATHER **GUARD**

**Weather station for health and property protection**

**Wario Weather** is a modern, highly sophisticated compact weather station for analyzing current weather conditions and forecasts. Knowing the exact weather conditions and trends allows preventing many unexpected situations that are associated with health and property protection. It helps by offering early important warnings and alerts in case of sudden or unexpected change in weather conditions. For example, analyzing long-term data about wind gust and precipitation allows setting the upper limits for issuing warnings and taking corresponding measures to protect health and property.

Using the Wario Weather station has many advantages. The measured values can be viewed using clear graphs up to 10 years back. In addition, the intuitive graphical user interface provides many additional and calculated values such as short-term forecast, zodiac, Moon phase, Moon rise and set times, Sun rise and Sun set times, day length, name day etc. All this can be viewed not just on a PC or laptop, but also smartphones, tablets or any other device that has access to the Internet via an Internet browser. It is also possible to set up email notifications when particular conditions are fulfilled.

## **MAIN ADVANTAGES OF USING THE WEATHER STATION TO PROTECT HEALTH AND PROPERTY**

-  *early warnings to protect people during sudden or expected changes in weather conditions*
-  *possibility to view historical data, make statistical analyses and display graphs up to 10 years back, including the maximum and minimum measured values*
-  *no additional costs or fees associated with operating the station or publishing data on the Internet*

The weather station provides you with the possibility to share the measured values either by easily integrating it into your own already existing webpage, or you can take advantage of the possibility to use many tools for analyzing the actual and historical data and viewing them directly at **[www.meteo-pocasi.cz](http://www.meteo-pocasi.cz)**.
