## Weather station for smart homes

**Wario Weather** is a modern, highly sophisticated compact weather station for analyzing current weather conditions and forecasts, which will surely be a very valuable and useful addition to smart homes. It allows autonomously controlling operation of many other devices based on current and expected weather conditions, without the need to use any additional control system or computer. Wario Weather station can take care of controlling and timing for example heating, window blinds, watering or other elements integrated into the smart home environment. In addition, this can all be done directly from the weather station graphical user interface.

Using the Wario Weather station has many advantages. The measured values can be viewed using clear graphs up to 10 years back. In addition, the intuitive graphical user interface provides many additional and calculated values such as short-term forecast, zodiac, Moon phase, Moon rise and set times, Sun rise and Sun set times, day length, name day etc. All this can be viewed not just on a PC or laptop, but also smartphones, tablets or any other device that has access to the Internet via an Internet browser.

## MAIN ADVANTAGES OF USING THE WEATHER STATION IN SMART HOMES

-  *automatic control of elements integrated into the smart home environment based on current and expected weather conditions*
-  *energy savings*
-  *possibility of integrating the station into already existing home control systems*
-  *no additional costs or fees associated with operating the station or publishing data on the Internet*

The weather station provides you with the possibility to share the measured values either by easily integrating it into your own already existing webpage, or you can take advantage of the possibility to use many tools for analyzing the actual and historical data and viewing them directly at **[www.meteo-pocasi.cz](http://www.meteo-pocasi.cz)**.
